SUUNTO 3 FITNESS

SUUNTO APP

ENRICH YOUR EXPERIENCE WITH SUUNTO APP

The new Suunto app logs all your activities, and keeps you up to date on your activity, sleep and overall fitness trends. Share memorable moments from your activities and engage easily with others in the Suunto app community. The smart mobile connection delivers incoming calls, messages and notifications to your watch. Suunto app is compatible with Suunto 9 and Suunto 3 Fitness, and it is available in the App Store and Google Play.

Connecting Suunto 3 Fitness to the Suunto app enables speed and distance tracking and tracks your route, all based on your mobile device's GPS.

SUUNTO 9

- _ BATTERY LIFE 25 HOURS IN PERFORMANCE MODE, UP TO 120 HOURS IN ULTRA MODE
- _ INTELLIGENT BATTERY TECHNOLOGY WITH SMART CHARGING REMINDERS
- _ TESTED TO THE EXTREME IN THE TOUGHEST CONDITIONS
- _ FUSEDTRACK™ FOR IMPROVED TRACK AND DISTANCE ACCURACY

THE TOUGH AND DURABLE MULTISPORT GPS WATCH

When you have your mind set on a certain goal or adventure, you want to make sure your watch can also go the distance. With up to 120 hours of continuous exercise tracking Suunto 9 is built to last – just like you!

Suunto’s intelligent battery software reminds you to charge your watch before your long run and helps optimizing battery use on the go. Suunto 9 is designed to be as tough as you are – tested to the extreme with thousands of hours testing in the toughest conditions, it will be your trusted companion to confidently see you through any adventure.

FEATURE INDEX

3D COMPASS

With a conventional electronic compass, you need to hold the compass level to the horizon to get an accurate reading. Suunto's 3D compasses compensate for tilt, allowing you to get a reading regardless of the angle of your wrist.

ADAPTIVE TRAINING GUIDANCE

Suunto 3 Fitness creates a training plan that adapts to the rhythm and intensity of your exercises. Real-time guidance during workout guides you to train at the right intensity.

ALTIMETER

Determine your current elevation, track your ascent or descent and gauge your overall progress on a climb – ideal for mountaineers, skiers and wilderness travelers.

AUTOMATIC ALTI / BARO SWITCH

Senses movement or lack thereof to automatically switch between altimeter and barometer. When you are climbing, for instance, it records the changes in elevation. And when you stop to rest, it records the changes in the barometric pressure.

AUTOMATIC SHOT DETECTION

The automatic shot detection feature was developed specifically for hunting. It works best with hunting rifles and shotguns. It is not intended for handguns or other firearms. The algorithm takes into account motion patterns from both wrist and gun recoil movement measured by the accelerometer in the watch to store shot location and number of shots fired.

BAROMETER

Forecast sudden alterations in the weather by keeping a close eye on the air pressure – and take the necessary precautions to help make your journey safe and successful.

BIKE POWER

Knowing the power output helps in estimating your efficiency while biking and save energy during long distances.

**Requires an external BLE bike power meter. Ambit3 Spartan watches are not compatible with ANT+™ devices.

BREADCRUMB TRAIL

Suunto Traverse automatically creates abreadcrumb trail during your activity recording. The breadcrumb is your instance trackback – if you need to return to your starting location, just turn around and follow the breadcrumb back.

MOBILE CONNECTIVITY

Connect your watch to your mobile phone via Suunto Movescount or Suunto App and get incoming calls, messages and notifications to watch.

DEPTH METER

Use your Suunto Core to calculate your current and maximum depth when on your next snorkeling dive.

FITNESS LEVEL

Suunto 3 Fitness evaluates your fitness level (VO2max) based on your personal profile and tracked running or walking exercises where heart rate and distance have been recorded.

FusedAlti™

FusedAlti™ introduces uniquely accurate altitude measurement combining GPS altitude and barometric altitude. GPS-based altitude can have temporary errors caused by e.g. bad satellite arrangement, or reflections and signal blocking by obstacles/buildings. The barometric altitude tends to include some offset caused mostly by changing air pressure. FusedAlti smartly corrects the effect of temporary and offset errors in the final altitude reading.

FusedSpeed™

Suunto introduces a new, patent-pending technology for speed readings called FusedSpeed™. The speed indication is a unique combination of GPS and acceleration sensor readings. The GPS signal is adaptively filtered based on acceleration, giving a more accurate reading at steady speeds and a quicker response to changes in speed.

GPS ALTITUDE

GPS altitude provides altitude readings directly and without calibration from the GPS data.

HEART RATE IN SWIMMING

During any swim session, Suunto Smart Sensor measures your heartrate, buffers it internally and transfers it to your Suunto 3 Fitness, Spartan and Ambit3 watch, or to Suunto Movescount app or Suunto app when you exit the water.

HR ZONES

Easy-to-read heart rate zone graphs indicate in what HR zone (1-5) you are training during an exercise.

MULTISPORT

Suunto Ambit3 PEAK and Ambit3 VERTICAL offer multisport support; In one log, you can easily swap sports and constantly see the relevant data while training. Change the sport on-the-go or create a multisport mode in advance in Movescount and download it to your watch – the watch then knows the order of sports you are about to do and adjusts the settings accordingly.

PEAK TRAINING EFFECT

To better reflect the meaning of the Training Effect measurement, Suunto has renamed the measurement to Peak Training Effect (PTE). PTE indicates the impact of a training session on your maximum aerobic performance and is most accurate with medium and high intensity training. The measurement is relative to your current fitness level. The fitter you are, the harder you have to work to reach a higher PTE.

RECOVERY TIME

Recovery time is an estimate of how long your body needs to recuperate after training. The time is based on the duration and intensity of the session, as well as the overall fatigue, accumulating even at lower intensities. Recovery time accumulates from one session to the next, if you train again before the time has expired.

ROUTE ALTITUDE NAVIGATION

Create routes in Suunto Movescount with topographic maps. Preview your route and its altitude profile on the watch and navigate. While en-route, you can locate yourself on the route altitude profile in real-time to see your ascent gain and remaining ascent.

RUNNING PERFORMANCE

In running sport modes, you can use the Running Performance graph in one of your sport mode displays to follow your performance level during a run. While running, the graph shows your current performance level compared to your 30-day average. At the end of the exercise, your log shows a summary of how your average performance level has developed over the past 30 days.

RUNNING CADENCE FROM WRIST

Measures speed and distance using the built-in accelerometer.

SLEEP QUALITY

Suunto 3 Fitness is able to track your heart rate variability during sleep, which indicates how well your sleep supports your recovery. The higher the variability, the better recovered you are.

STORM ALARM

Activated by a rapid drop in air pressure, the storm alarm lets you know that something unpleasant is fast approaching.

STRESS AND RECOVERY

Suunto 3 Fitness comes with stress and recovery measurement which indicates the level of physiological stress your body is experiencing at half an hour intervals. The measurement is based on your heart rate variability.

TRACK BACK

With Track back, you can retrace your route at any point during an exercise. Temporary waypoints are created during your exercise and are used to guide you back to your starting point when you select Track back from the navigation menu.

TRAINING PROGRAMS IN THE WATCH

You can sync your planned moves to the watch and get daily guidance as well as intensity guidance while exercising. Choose a training program from more than 15,000 available in Movescount.com or create your own.

ROUTE NAVIGATION

All Suunto GPS watches come with full route navigation. Plan your own routes on Movescount, from scratch or taking a ready made route from the library. You also decide if you want to follow the roads, or take the shortest route to the destination. Open street maps now give you even better means to discover new landscapes. Once the route is downloaded on the watch, you will be guided to your destination.

PLANNED MOVES

Plan upcoming training sessions in Suunto Movescount. Define the activity, intensity, duration and/or distance and save the Move to your training calendar and it is automatically transferred to your compatible Suunto sports watch when you sync it with Movescount.

ROUTE PLANNING WITH HEATMAPS

Heatmaps for more than 15 sports reveal the tracks frequently used by the Suunto Movescount community all over the globe, based on millions of Moves. Connect to your compatible Suunto sports watch and navigate the route with your watch.

A photograph of a dense forest with tall, thin trees and a large, weathered log in the foreground. Two hikers are visible in the background, walking through the forest. The forest floor is covered in green ferns and moss. The trees are mostly deciduous with some evergreens. The lighting is soft, suggesting an overcast day. The hikers are wearing backpacks and are walking away from the camera. The log in the foreground is large and has a rough, weathered texture. It is covered in moss and lichen. The background shows a dense stand of trees reaching up towards the sky. The overall scene is a lush, green forest landscape.

CONQUERING NEW TERRITORY SINCE 1936

1989
Almost all the boats in the "Whitbread Round the World" races are equipped with Suunto compasses.

1987
The SME dive computer is developed.

1965
Suunto's first dive compass, the SK-4, is developed. It is used actively by the legendary Jacques Cousteau.

1950
Suunto begins manufacturing orienteering and marine compasses.

1936
Production of marching compasses starts in 1936.

2004
Suunto X9, the world's first wrist GPS with comprehensive navigation and outdoor functionality is launched. Suunto t6, a top-level heart rate monitor is introduced.

2007
Suunto launches the award winning Suunto Core outdoor sports watch.

2009
Suunto Elementum is unveiled.

2012
Suunto Ambit, the ultimate outdoor watch with GPS functionality, is launched.

2014
The Suunto Connected Family with Ambit3 and the new era dive computer Suunto EON Steel are launched.

2016
Suunto celebrates it's 80th anniversary and launches Suunto Spartan watches.

2018
Suunto expand its selection to Fitness watches when Suunto 3 Fitness is launched.

When Finnish engineer and orienteer Tuomas Vohlonen invented the mass production method of liquid-filled compasses in 1936, Suunto was born. To this day, Suunto remains at the forefront of innovation in the sports industry. A leading designer and manufacturer of dive computers, sports watches and precision instruments, Suunto's passion is shared by adventurers around the globe.

SUUNTO CUSTOMER CARE

REPAIR SERVICES THROUGH THE SUUNTO SERVICE NETWORK

- _ Premium repair services for Suunto devices worldwide
- _ Suunto operated service centers in Finland, USA, and Hong Kong
- _ Around 85 authorized service centers globally

Go to www.suunto.com/support to learn more about Suunto repair services: find your nearest authorized service center or alternatively, submit an online service request to get a door-to-door courier service.

INTERNATIONAL WARRANTY

All Suunto products enjoy warranty repairs at Suunto authorized service centers worldwide – regardless of the place where the product was purchased. International Limited Warranty applies to all Suunto products that are currently under warranty. To qualify, customers need to register their device at www.suunto.com/mysuunto and to present a purchase receipt upon delivering their device to the service center. Full warranty terms are explained at www.suunto.com/support

CUSTOMER SUPPORT

Visit www.suunto.com/support to access Suunto User Guides, How-To videos and product Q&As. If you need personalized assistance, submit your question using the contact form or call us. We speak Chinese, English, Finnish, French, German, Italian, Japanese, Russian, Spanish or Swedish.
