NEW FROM SUUNTO

SUUNTO APP
SUUNTO 9
SUUNTO 3 FITNESS
ENRICH YOUR EXPERIENCE WITH SUUNTO APP

The new Suunto app logs all your activities, and keeps you up to date on your activity, sleep and overall fitness trends. Share memorable moments from your activities and engage easily with others in the Suunto app community. The smart mobile connection delivers incoming calls, messages and notifications to your watch. Suunto app is compatible with Suunto 9 and Suunto 3 Fitness, and it is available in the App Store and Google Play.

Connecting Suunto 3 Fitness to the Suunto app enables speed and distance tracking and tracks your route, all based on your mobile device’s GPS.
When you have your mind set on a certain goal or adventure, you want to make sure your watch can also go the distance. With up to 120 hours of continuous exercise tracking Suunto 9 is built to last – just like you! Suunto’s intelligent battery software reminds you to charge your watch before your long run and helps optimizing battery use on the go. Suunto 9 is designed to be as tough as you are – tested to the extreme with thousands of hours testing in the toughest conditions, it will be your trusted companion to confidently see you through any adventure.

SUUNTO 9 HIGHLIGHTS

- BATTERY LIFE 25 HOURS IN PERFORMANCE MODE, UP TO 120 HOURS IN ULTRA MODE
- INTELLIGENT BATTERY TECHNOLOGY WITH SMART CHARGING REMINDERS
- TESTED TO THE EXTREME IN THE TOUGHEST CONDITIONS
- FUSEDTRACK™ FOR IMPROVED TRACK AND DISTANCE ACCURACY

GPS watches
Curiosity drives us to seek out and discover new places, but it’s the confidence of finding our way that encourages us to step off the beaten track. Topographic maps in Movescount and the integrated GPS and GLONASS navigation of Suunto Traverse help you plan your hikes and find your way in the wild. The automatic breadcrumb of your track ensures you can re-trace your steps when needed. The strong build and powerful battery of Suunto Traverse keep you exploring hour after hour.

MIRROR SIGHTING COMPASSES
ATTACHABLE COMPASSES
SPORTS ORIENTEERING
SWISS ARMY STYLE
PRECISION INSTRUMENTS
A reliable compass is essential for navigating and surviving in extreme conditions. These hardy baseplate compasses are ready for the challenge.

When venturing out into new territory, these sighting compasses offer precision navigation with a variety of carefully engineered and dependable features for challenging conditions.

Suunto attachable compasses are particularly handy, when both hands are needed to get past the next challenge.

Stable, clear and quick. These compasses are made for fast competitive orienteering.

Originally developed for the Swiss Army, this compass features an exceptionally rugged protective housing and clever features for navigating at high elevation.

Rugged and reliable, Suunto professional instruments meet exceptionally high quality standards for demanding jobs.

## Suunto Smart Sensors

Compatible with all Bluetooth smart watches.
FEATURE INDEX

3D COMPASS
With a conventional electronic compass, you need to hold the compass level to the horizon to get an accurate reading. Suunto’s 3D compasses compensate for tilt, allowing you to get a reading regardless of the angle of your wrist.

ADAPTIVE TRAINING GUIDANCE
Suunto 3 Fitness creates a training plan that adapts to the rhythm and intensity of your exercises. Real-time guidance during workout guides you to train at the right intensity.

ALTIMETER
Determine your current elevation, track your ascents or descents and gauge your overall progress on a climb – ideal for mountaineers, skiers and wilderness travelers.

AUTOMATIC ALTI/BARO SWITCH
Sensed movement or lack thereof to automatically switch between altimeter and barometer. When you are climbing, for instance, it records the changes in elevation. And when you stop to rest, it records the changes in the barometric pressure.

AUTOMATIC SHOT DETECTION
The automatic shot detection feature was developed specifically for hunting. It senses best with hunting rifles and shotguns. It is not intended for handguns or other firearms. The algorithm takes into account motion patterns from both wrist and gun recoil movement measured by the accelerometer in the watch to stone shot location and number of shots fired.

BAROMETER
Forecast sudden alterations in the weather by keeping a close eye on the air pressure – and take the necessary precautions to help make your journey safe and successful.

BIKE POWER
Knowing the power output helps in estimating your efficiency while biking and saved energy during long distances.

**Requires an external BLE bike power meter. Ambit3 Spartan watches are not compatible with AMBI™ devices.

BREADCRUMB TRAIL
Suunto’s Trace automatically creates a breadcrumb trail during your activity recording. The breadcrumb is your instance traceback – if you need to return to your starting location, just turn around and follow the breadcrumb back.

MOBILE CONNECTIVITY
Connect your watch to your mobile phone via Suunto Movescount or Suunto app and get incoming calls, messages and notifications to watch.

DEPTH METER
Use your Suunto Core to calculate your current and maximum depth when on your next snorkeling dive.

FITNESS LEVEL
Suunto 3 Fitness evaluates your fitness level (VDValue) based on your personal profile and tracked running or walking exercises where heart rate and distance have been recorded.

FUSEDALT™
FusedAlt™ introduces uniquely accurate altitude measurement combining GPS altitude and barometric altitude. GPS-based altitudes can have temporary errors caused by e.g. bad satellite arrangement, or reflections and signal blocking by obstacles/buildings. The barometric altitude tends to include some offset caused mostly by changing air pressure. FusedAlt™ correctly smart the effect of temporary and offset errors in the final altitude reading.

FUSEDSPEED™
Suunto introduces a new, patent-pending technology for speed readings called FusedSpeed™. The speed indication is a unique combination of GPS and acceleration sensor readings. The GPS signal is adaptively filtered based on acceleration, giving a more accurate reading at steady speeds and a quicker response to changes in speed.

FusedGPS™
GPS altitude provides altitude readings directly and without calibration from the GPS data.

HEART RATE IN SWIMMING
During any swim session, Suunto Smart Sensor measures your heart rate, buffers it internally and transfers it to your Suunto 3 Fitness, Spartan, and Ambit3 watch, or to Suunto Movescount app or Suunto app when you exit the water.

HR ZONES
Easy-to-read heart rate zone graphs indicate in what HR zone (1-5) you are training during an exercise.

MULTISPORT
Suunto Ambit3 PEAK and Ambit3 VERTICAL offer multisport support. In one log, you can easily swap sports and constantly see the relevant data while training. Change the sport on the go or create a multisport mode in advance in Movescount and download it to your watch – the watch then knows the order of sports you are about to do and adjusts the settings accordingly.

PEAK TRAINING EFFECT
To better reflect the meaning of the Training Effect measurement, Suunto has renamed the measurement to Peak Training Effect (PTE). PTE indicates the impact of a training session on your maximum aerobic performance and is most accurate with medium and high intensities training. The measurement is relative to your current fitness level. The fitter you are, the harder you have to work to reach a higher PTE.

RECOVERY TIME
Recovery time is an estimate of how long your body needs to recuperate after training. The time is based on the duration and intensity of the session, as well as the overall fatigue,accumulating even at lower intensities. Recovery time accumulates up to 30 minutes after the next, if you train again before the time has expired.

ROUTE NAVIGATION
All Suunto GPS watches come with full route navigation. Plan your own routes or Movescout, from scratch or taking a ready made route from the library. You also decide if you want to follow the roads, or take the shortest route to the destination. Open street maps now give you even better means to discover new landscapes. Once the route is downloaded on the watch, you will be guided to your destination.

PLANNED MOVES
Plan upcoming training sessions in Suunto Movescout. Define the activity, intensity, duration and distance and save the Move to your training calendar and it is automatically transferred to your compatible Suunto sports watch when you sync it with Movescout.

STORM ALARM
Activated by a rapid drop in air pressure, the storm alarm lets you know that the weather is about to change and you need to return indoors and take necessary measures.

TRAINING PERFORMANCE
In running sport modes, you can use the Running Performance graph in one of your sport mode displays to follow your performance level during a run. While running, the graph shows your current performance level compared to your 30-day average. At the end of the exercise, your log shows a summary of how your average performance level has developed over the past 30 days.

RUNNING CADECE FROM WRIST
Measures speed and distance using the built-in accelerometer.

SLEEP QUALITY
Suunto 3 Fitness is able to track your heart rate variability during sleep, which indicates how well your sleep supports your recovery. The higher the variability, the better recovered you are.

STRESS LEVEL
Suunto 3 Fitness comes with stress and recovery measurement which indicates the level of physiological stress your body is experiencing at half an hour intervals. The measurement is based on your heart rate variability.

TRACK BACK
With Track back, you can retrace your route at any point during an exercise. Temporary waypoints are created during your exercise and are used to guide you back to your starting point when you select Track back from the navigation menu.

TRAINING PROGRAMS IN THE WATCH
You can sync your planned moves to the watch and get daily guidance as well as intensity guidance while exercising. Choose a training program from more than 15,000 available in Movescout.com or create your own.

ROUTE PLANNING WITH HEATMAPS
Heatmaps for more than 15 sports reveal the tracks frequently used by the Suunto Movescout community all over the globe, based on millions of Moves. Donate to your compatible Suunto sports watch and navigate the route with your watch.

- **Sports Orienteering Compasses:** Designed for serious orienteers and top competitors.
- **Swiss Army Style Compasses:** For globetrotters and mountaineers.

---

**Manufacturer Information:**
- **SUUNTO:** A leading brand in compasses and orientation equipment.
- **MC-2 NH COMPASS:** Ideal for serious hikers.
- **MC-2 G COMPASS:** Designed for global mountaineers.
- **MC-2 G U.S.G. COMPASS:** Suitable for adventurers.
- **MC-2 G COMPASS:** Ideal for adventurers and professionals.
- **MC-2 G WORLD COMPASS:** Suitable for global mountaineers.

---

**Customer Support:**
- For more information, contact SUUNTO customer support at 1-800-328-1310.
- Visit the SUUNTO website for the full product line.

---

**Safety Tips:**
- Always use a proper compass for accurate navigation.
- Keep your compass clean and dry to maintain its accuracy.
- Practice with your compass to ensure you can use it effectively in the field.

---

**Conclusion:**
- The choice of compass depends on the user's needs and preferences.
- SUUNTO offers a wide range of models to cater to various outdoor activities.

---

**Feature Comparison Charts:**
- Detailed comparison charts are available on the SUUNTO website for further analysis.

---

**Research:**
- Compass design and functionality are crucial for various outdoor activities.
- SUUNTO's compasses are trusted by professionals and enthusiasts worldwide.

---

**Conclusion:**
- SUUNTO's field compasses are designed for precision and durability, making them a valuable tool for outdoor activities.
- Choose the right compass for your adventure to ensure safety and accuracy.

CONQUERING NEW TERRITORY SINCE 1936

When Finnish engineer and orienteer Tuomas Vohlonen invented the mass production method of liquid-filled compasses in 1936, Suunto was born. To this day, Suunto remains at the forefront of innovation in the sports industry. A leading designer and manufacturer of dive computers, sports watches and precision instruments, Suunto’s passion is shared by adventurers around the globe.

1936 Production of marching compasses starts in 1936.

1950 Suunto begins manufacturing orienteering and marine compasses.

1965 Almost all the boats in the “Whitbread Round the World” races are equipped with Suunto compasses.

1987 Suunto Vector, the world’s first wrist GPS with comprehensive navigation and outdoor functionality, is launched.

1989 Suunto launches the award winning Suunto Core outdoor sports watch.

1998 Suunto Ambit, the ultimate outdoor watch with GPS functionality, is launched.

2004 Suunto SKX, the world’s first wrist dive computer, is launched.

2007 Suunto Celebrates its 80th anniversary and launches Suunto Spartan watches.

2009 Suunto Vector is launched.

2009 Suunto launches the award winning Suunto Core outdoor sports watch.

2012 The Suunto Connected Family with Ambit3 and the new era dive computer Suunto EON Steel are launched.

2014 Suunto elements is unveiled.

2016 Suunto launches the award winning Suunto Core outdoor sports watch.

2018 Suunto Vector is launched.

2018 Suunto launches the award winning Suunto Core outdoor sports watch.

SUUNTO CUSTOMER CARE

REPAIR SERVICES THROUGH THE SUUNTO SERVICE NETWORK

- Premium repair services for Suunto devices worldwide
- Suunto operated service centers in Finland, USA, and Hong Kong
- Around 85 authorized service centers globally

Go to www.suunto.com/support to learn more about Suunto repair services: find your nearest authorized service center or alternatively, submit an online service request to get a door-to-door courier service.

INTERNATIONAL WARRANTY

All Suunto products enjoy warranty repairs at Suunto authorized service centers worldwide – regardless of the place where the product was purchased. International Limited Warranty applies to all Suunto products that are currently under warranty. To qualify, customers need to register their device at www.suunto.com/mysuunto and to present a purchase receipt upon delivering their device to the service center. Full warranty terms are explained at www.suunto.com/support
